

thoughts on polycarbonate on roof(s), if any?

vertical, instead of sloped? work better with polycarbonate

datum of structural wall girts determines locations of material change (all facades) 4ft O.C.

articulate entrance to sports complex?

small base necessary?

to my eye, this piece seems proportionally incongruous with the horizontality of the rest of the facade composition.

this first 'step' might be too high. Start at 4ft off the floor, to accomodate windows?

think this 'event' should happen at the entrance of the fitness center...make it less arbitrary.
